May 19th, 2015

Dear Hiring Manager,

I would like to take this chance to informally discuss my qualifications and my slightly different background to hopefully supplement my resume. As an aspiring student that's transferring from an accounting career with a genuine passion for technology and innovation, the tech environment is something I've always pursued and am familiar with. I am applying because I truly believe I will be able a natural cultural fit.

I come from a large family deeply embedded in the finance world who had my future planned. Growing up as such, I hardly valued the Java games that I built in my spare time and went into the Math/CPA program and did my first coop term as an auditor at KPMG. Despite my passion for tech, I was able to justify this to myself by working as a consultant for startups at Ace Consulting Group during school terms and working in the technology practice at KPMG. I picked up enormous amounts of business and interpersonal skills and incorporated my CS background at every opportunity to automate my work. However, I recently realized that this did not satisfy my passion for the industry and I switched into the Computing and Financial Management program to pursue my interest in everything tech. In my spare time, I eagerly explore new technologies, work as a part-time developer for a local startup, and closely follow tech news. I also assume several leadership positions in my faculty as seen in my resume. I would be able to bring my passion for computer science, my business background, and my continuously growing technical knowledge to any workplace.

If you have any questions after reviewing my resume please do not hesitate to contact me at (226)-989-5188 or via email at arthur.yase.wang@gmail.com. It would be a great opportunity to chat with you in person and I greatly thank you for your time and consideration

Sincerely,

A handwritten signature in black ink, reading "Arthur Wang". The signature is fluid and cursive, with the first name "Arthur" written in a more stylized, looped manner and the last name "Wang" in a simpler, more direct cursive.

Arthur Wang
